EDUCATION

VIT Bhopal University
Computer Science and
Engineering

Aug 2023 - May 2027

Bhopal, India

APEX Public School
(Secondary Education)

February 2021 - March 2022

Jodhpur (Raj.), India

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, HTML, CSS, JavaScript
- **Libraries & Frameworks:** NumPy, Flask, MATLAB
- **Databases:** MongoDB, MySQL
- **Tools:** MS Office Suite
- **Platforms:** GitHub, VS Code, Jupyter Notebook, IntelliJ IDEA
- **Soft-Skills:** Rapport Building, Cross-functional Collaboration

RELEVANT EXPERIENCE

Software Development Intern - Prodigy Infotech

Aug 2025 – Sept 2025

- Designed and implemented a series of functional applications to solve distinct logical and data-driven problems, including a Sudoku puzzle solver, a data-centric contact management system, and a temperature conversion utility.
- Created an interactive guessing game and a web scraping tool, demonstrating the ability to automate data collection and build engaging, data-informed user experiences.

GenAI Intern - Adroit Technologies

May 2025 – June 2025

- Interned at Adroit Technologies, exploring IBM Cloud services including Watsonx for building prompt-based AI applications.
- Implemented a Python-based tokenizer to categorize user reviews into positive (1), neutral (0), and negative (-1) sentiments, enhancing feedback analysis capabilities.

PROJECTS

Prodigy Infotech Internship Projects | [LINK](#)

March 2025

- **Temperature Conversion Tool:** Developed a Python-based application to convert temperatures between Celsius, Fahrenheit, and Kelvin, ensuring accurate and user-friendly functionality.
- **Sudoku Solver:** Built a Python program utilizing backtracking algorithms to efficiently solve Sudoku puzzles, demonstrating strong problem-solving and logical programming skills.
- **Web Scraping Project:** Created a web scraping tool using Python libraries like BeautifulSoup and Requests to extract and process data from websites, enhancing data collection capabilities.
- **Guessing Game & Contact Management:** Designed an interactive number guessing game and a contact management system in Python, showcasing proficiency in user interface design and data management.

IBM WatsonX AI Feedback Classifier

August 2024

- Developed a prompt AI using IBM Cloud WatsonX to analyze and classify user feedback.
- Implemented a Python tokenizer to categorize sentiment as good (1), neutral (0), or very bad (-1).

CERTIFICATES

Foundation of Cybersecurity, Google

Feb 2024

- Gained foundational knowledge in cybersecurity principles, threat detection, and incident response. Developed skills in protecting systems and data from cyber threats.

GenAI Using IBM Watsonx, IBM

Jan 2025

- Explored generative AI concepts and practical applications using IBM Watsonx. Acquired hands-on experience in building and deploying AI models for various use cases.

Introduction to Machine Learning, NPTEL

May 2025

- Completed a comprehensive introduction to machine learning algorithms and techniques. Developed a strong understanding of supervised, unsupervised, and reinforcement learning.

Python Essentials, Programing in Java, VITYARTHI

Dec 2023,
April 2025

- Mastered core Python programming concepts, data structures, and object-oriented programming. Built a strong foundation for developing robust and efficient Python applications.
- Acquired proficiency in Java programming fundamentals, including syntax, object-oriented principles, and data handling. Developed skills in building cross-platform applications.
